

Addendum

Index of Figures

Chapter 1 – Electrical Safety		
Figure No.	Title	Page No.
1.1	The Risk Management Process	2
1.2	Current Paths in General	5
1.3	Typical Values of Resistance	7
1.4	Preventing Electrocutation	8
1.5	The Positive Effects of Grounding Circuits	8
1.6	Example of a Lock Out / Tag Out System	13
1.7	Verifying the Operation of a Voltage Tester	14
1.8	Discharging a Capacitor	14
1.9	Safety Gloves	15
1.10	Insulated Tools	16
1.11	A Double Insulated Meter	17
1.12	Non conducting tools used to remove fuses	17
1.13	A CT	18
1.14	A Safety Harness	19

Chapter 2 – Practical Aspects of Electrical Circuits		
Figure No.	Title	Page No.
2.1	Fuse Switch Isolator	30
2.2	Cartridge Fuse Links in a High Rupturing Capacity Fuse	31
2.3	Inverse Time Current Curve for a 30A HRC Fuse (Not to Scale)	32
2.4	Sectional Views of Two Types of High Rupturing Capacity Fuses	33
2.5	Load Current versus Fuse Link Rating	35
2.6	A Basic MCB	37
2.7	Sectional View of the MCB	38
2.8	The Common MCCB	39
2.9	The MCCB with a Rotary On-off Function	39
2.10	MCCBs in a Group Starter Panel's Circuit	40
2.11	Magnetic Protection for the protection over $3 \times I$ Nominal	41

Addendum **Index of Figures**

Chapter 2 – Practical Aspects of Electrical Circuits (Continued)		
Figure No.	Title	Page No.
2.12	Working of a Main Contactor (88)	42
2.13(a)	The Main Contactor and its Auxiliary Contacts	43
2.13(b)	Marking of the Main Contactor Coil and its Contacts	43
2.14	Marking of the Auxiliary Contacts	43
2.15	The Over Current Relay	44
2.16	Working of the Over Current Relay	45
2.17(a)	The Physical Components for Thermistor-based Protection in a Motor	46
2.17(b)	The Connection Diagram for Figure 2.17(a)	46
2.18	A Typical Electromechanical Relay	47
2.19	A Shading Ring in an AC Relay	47
2.20	Diodes in a Shading Circuit of an AC Relay	48
2.21	Contact Groups in an 11pin Relay	49
2.22	A Modern Electronic Timer with Various Modes	49
2.23	Timer Circuit Components	49
2.24	Timing Diagram of an On-delay Timer	50
2.25	Timing Diagram of an Off-delay Timer	50
2.26	Timing Diagram of the On-delay / Off-delay Timer	51
2.27	Timing Diagram of an On / Off Recycling Timer	52
2.28	Details of a Multifunction Relay	52
2.29	Wiring Diagram of a Multi-Function Relay	53
2.30	Dual-coil Latch Relay	53
2.31	Wire Connections	54
2.32	Transformer	54
2.33	Ground Connections	54
2.34	Bell and Buzzer	55
2.35	Relays	55
2.36	Lamps	56
2.37	Resistors	56

Addendum **Index of Figures**

Chapter 2 – Practical Aspects of Electrical Circuits (Continued)		
Figure No.	Title	Page No.
2.38	Motor, Ammeter, Voltmeter Symbols	56
2.39	Phase Connections	56
2.40	Switches and Contact Symbols	57
2.41	Interlocks in a Motor Control Circuit	58
2.42(a)	A DG Monitoring and Control Circuit	61
2.42(b)	A DG Monitoring and Control Circuit (Continued)	62
2.42(c)	A DG Monitoring and Control Circuit (Continued)	63
2.42(d)	A DG Monitoring and Control Circuit (Continued)	64
2.42(e)	A DG Monitoring and Control Circuit (Continued)	65
2.43	Various Terminals used for Crimping Wire Connectors	66
2.44	Crimping Tools and Crimped Terminals	67
2.45	Detection and Clearance of an Earth Fault -The First Step	68
2.46	Detection and Clearance of an Earth Fault -The Second Step	69
2.47	A Megger's Circuit	73
2.48	Cold Checks with a Megger	74

Chapter 3 – Electronic Components		
Figure No.	Title	Page No.
3.1	Capacitor Symbols and Components	75
3.2	Capacitors in Series and Parallel	76
3.3	An Inductor's Symbols and its Components	77
3.4	Inductors in Series and Parallel	78
3.5	A Resistor in a Basic Circuit and the Ohm's Law Triangle	78
3.6	Identifying Resistor Bands	79
3.7	Resistors in Series and Parallel	80
3.8	An N - type Semiconductor	81
3.9	A P - type Semiconductor	82
3.10	Forward and Reverse Bias Regions of a Diode	83

Addendum **Index of Figures**

Chapter 3 – Electronic Components (Continued)		
Figure No.	Title	Page No.
3.11	A Basic Full- wave Rectifier	84
3.12	A Full-wave Bridge Rectifier and Standard Rectifiers	84
3.13	A Basic 3- Phase Rectifier Circuit	85
3.14	Testing a Diode	86
3.15	A Zener Diode and its Symbol	87
3.16	A Zener Diode as a Voltage Regulator	87
3.17	A Basic Photo Diode Circuits	88
3.18	A Light Emitting Diode	88
3.19	A Basic Opto- coupler Circuit	89
3.20	Formation of NPN and PNP Transistors	90
3.21	Working of a Transistor	91
3.22	Current Flow in a Transistor	91
3.23	A Basic Transistor Amplifier Circuit	93
3.24	Opto-coupler Circuits with Photo Transistors	93
3.25(a)	Steps in Identifying the Pins of Transistors	94
3.25(b)	Pins of Various Type of Transistors	95
3.26	Common Emitter	96
3.27	Common Collector	96
3.28	Common Base	96
3.29	A Field Effect Transistor	97
3.30	N- channel JFET	97
3.31	P- channel JFET	97
3.32(a)	Working of a FET	98
3.32(b)	Behaviour of a FET	99
3.33	JFET as an Amplifier	99
3.34	Schematic Diagram of an Operational Amplifier and IC 741	101
3.35	A Basic Op- Amp IC's Pin Configuration	101
3.36	An Inverting Amplifier	102

Addendum

Index of Figures

Chapter 3 – Electronic Components (Continued)		
Figure No.	Title	Page No.
3.37	A Non- Inverting Amplifier	102
3.38	A Differential Amplifier	103
3.39	A Summing Operation	103
3.40	A Differentiator	104
3.41	An Integrator	104
3.42	Digital to Analog Converter	105
3.43	Physical Appearance of the SCR	105
3.44	The SCR	106
3.45	Power Control Using an SCR	107
3.46	SCR Output with a Gate Pulse Delay	108
3.47	Testing the SCR	109
3.48	A DIAC	109
3.49	A TRIAC	109
3.50	AC Power Control Circuit using a TRIAC	110
3.51	A MOSFET	111
3.52	Cross- section of the MOSFET	111
3.53	The Enhancement and Depletion Modes in a P- Channel MOSFET	112
3.54	The Enhancement and Depletion Modes in an N-Channel MOSFET	113
3.55	The N- Channel MOSFET and its Terminals	113
3.56	The IGBT and its Symbol	114
3.57	N- Channel IGBT Cross Section	114
3.58	N- Channel IGBT Equivalent Circuit	115
3.59	Turning On an IGBT	115
3.60	The IGBT	116
3.61	A Digital Signal	117
3.62	Output Q = A.B	118
3.63	Output Q = A+B	118
3.64	Output Q = A (+) B	119

Addendum **Index of Figures**

Chapter 3 – Electronic Components (Continued)		
Figure No.	Title	Page No.
3.65	Output $Q = \overline{A}$	119
3.66	Output $Q = \overline{A.B}$	120
3.67	Output $Q = \overline{A+B}$	120
3.68	Output $Q = \overline{A (+) B}$	120
3.69	The AND Gate Using NAND Gates	121
3.70	The OR Gate Using NAND Gates	122
3.71	The NOT Gate	122
3.72	The NOR Gate	123
3.73	The XOR Gate	123
3.74	The XNOR Gate	124

Chapter 4 – Alternators, Switchboards and Switchgear		
Figure No.	Title	Page No.
4.1	Fleming's Right Hand Rule and Generation of Electromotive Force	125
4.2	A Star-connected Alternator and its Three-phase Output Waveform	126
4.3	An Alternator with an Insulated Neutral	127
4.4	Frequency of the Induced E.M.F.	128
4.5	Construction of a Brushless Alternator	129
4.6	A Brushless Alternator's Exciter and Main Field	130
4.7	A Brushless Alternator's Circuit and Terminal Plate	130
4.8	A Separately Excited Alternator	131
4.9	Flashing an Alternator	133
4.10	An Alternator with Salient Pole Rotor (Field)	135
4.11	Cylindrical Rotor Field Winding	136
4.12	Flange-mounted Sleeve Bearing	138
4.13	Integral Pedestal Sleeve Bearing	138
4.14	An Automatic Voltage Regulator that uses Zener Diodes and Thyristors	142
4.15(a)	A Static Excitation System	144

Addendum **Index of Figures**

Chapter 4 – Alternators, Switchboards and Switchgear (Continued)		
Figure No.	Title	Page No.
4.15(b)	Another Variant of a Static Excitation System	145
4.16	Circuit Diagram of an Alternator with a Static Excitation System	147
4.17	A Basic Synchronising Circuit	150
4.18	A Plastic Feeler Gauge Used to Measure the Air Gap	152
4.19	Parts of an Air Circuit Breaker	160
4.20	A Basic Air Circuit Breaker (ACB) for Alternators	161
4.21	Sectional View of an Air Circuit Breaker	163
4.22	Pictorial Diagram of a Modern Air Circuit Breaker	164
4.23	A Basic Control Circuit Diagram of an ACB	168
4.24	Protection Features in a Ship's Power Management System	172
4.25	Overload and Preference Trips	173
4.26	Block Diagram of an Electronic Over Current Relay	177
4.27	Circuit Diagram of an Electronic Over Current Relay	177
4.28	A Reverse Power Relay and Recommended Settings by One Manufacturer	179
4.29	Voltage Conditions	182
4.30	A Shore Supply Connection Box	186
4.31	Shore Supply Arrangement	187

Chapter 5 – Starters and Control Equipment for Motors		
Figure No.	Title	Page No.
5.1	Flemings Left Hand Rule	191
5.2	Classification of Electric Motors Generally in Use	192
5.3	Parts of a DC Motor	192
5.4	Working Principle of a DC Motor	193
5.5	Sectional View of a DC Motor	194
5.6	Series-wound DC Motor	194
5.7	Shunt-wound DC Motor	194
5.8	Compound-wound DC Motor	195

Addendum **Index of Figures**

Chapter 5 – Starters and Control Equipment for Motors (Continued)		
Figure No.	Title	Page No.
5.9	Sectional View of a Brushless DC Motor	196
5.10	Rotating Field of a BLDC Motor	197
5.11	Hall Sensors Embedded in the Stator of a BLDC Motor	197
5.12	Control Circuit of the Brushless DC (BLDC) Motor	198
5.13	A Three-point Starter for a DC Motor	199
5.14	A Four-point Starter for a DC Motor	200
5.15	Parts of an Induction Motor	202
5.16	Rotating Field Produced by 3Phase Supply	202
5.17	An Induction Motor's Stator and Rotor	203
5.18	A Wound Rotor Three-phase Induction Motor	204
5.19	Speed - Torque and Speed - Current Curves	205
5.20	Circuit of a Split-phase Induction Motor	206
5.21	A Capacitor-start Capacitor-run Motor	207
5.22	Sectional View of a Synchronous Motor	208
5.23	Magnetic Locking of a Synchronous Motor	208
5.24	A Universal Motor	209
5.25	DOL Starter of a Pump Motor - with Auto Start and Stop Functions	217
5.26	A Main Engine's Turning Gear Circuit	218
5.27	Star-delta Connections at the Motor end	220
5.28	A Basic Star-delta Starter Circuit	221
5.29	A Star-delta Starter Circuit for a Heavy Duty Motor	223
5.30	Comparison of Current Drawn in Star and Delta Modes	225
5.31	A Basic Auto Transformer Starter Circuit	226
5.32(a)	An Auto Transformer's Power Circuit for a Heavy-duty Motor	227
5.32(b)	An Auto Transformer's Control Circuit for a Heavy-duty Motor	230
5.32(c)	Heater Control Circuit for the Heavy Duty Motor (Controlled by the Auto Transformer Starter's Control Circuit in Figure 5.32(b))	231
5.33	A Microprocessor-based Starter Control Circuit	232

Addendum

Index of Figures

Chapter 5 – Starters and Control Equipment for Motors (Continued)		
Figure No.	Title	Page No.
5.34	A Basic Soft Starter Circuit	234
5.35	Pictorial Representation of a Soft Starter as installed	235
5.36	The Main Components in the Soft Starter	235
5.37	The Three Stages in a VFD Circuit	236
5.38	Circuit diagram for a Pulse Width Modulated Variable Frequency Drive	237
5.39	Graph Comparing Voltage to Current for a Pulse Width Modulated Variable Frequency Drive	238
5.40	A Basic Circuit of the 3-phase Inverter	238
5.41	Method to create 3-phase AC for a Pulse Width Modulated VFD	239
5.42	Voltage / Frequency Pattern	240
5.43	Output Voltage Low / High	240
5.44	Voltage / Frequency Pattern versus Motor Output Torque	241
5.45	Pictorial Representation of the PWM Controller	241
5.46	Dual Voltage / Speed Motor Connection	242
5.47	A Vibration Velocity Bar Graph	246
5.48	The Frequency Spectrum	247
5.49	Full-load Healthy Condition	250
5.50	Half-load Single-phase Condition	250
5.51	Interference Fit	256
5.52	Terminals of a 3-phase 6-terminal AC Motor	258
5.53	Coupling Alignment	260

Chapter 6 – Miscellaneous Systems		
Figure No.	Title	Page No.
6.1	Impressed Current System	264
6.2	A Basic Circuit of an Impressed Current System	264
6.3	Layout of a Basic Impressed Current Cathodic Protection System	265
6.4	Schematic Diagram of an Impressed Current Cathodic Protection System	267

Addendum **Index of Figures**

Chapter 6 – Miscellaneous Systems (Continued)		
Figure No.	Title	Page No.
6.5	Example of System Components (Forward) and Remote Monitor	268
6.6	Example of System Components (Aft)	269
6.7	The MGPS Control Panel	271
6.8	Piping and Instrumentation Diagram of the MGPS	272
6.9	The Fluorescence Oil Content Monitor	274
6.10	The Probe and Block Diagram of the Oil Level Detector's Circuit	275
6.11	A Combustible Gas Indicator	276
6.12	Two Variants of Combustible Gas Indicators	277
6.13	A Tankscope	278
6.14	Circuit Diagram of a Tankscope	279
6.15	The O ₂ Analyser	281
6.16	Creation of the Magnetic Field	281
6.17	The Basic Device	281
6.18	Achieving Torque Balance	282
6.19	Generating the Output Signal	282
6.20	A Resonator Circuit	282
6.21	Basic Circuit of the Munday Cell	283
6.22	Sensitive Element of the Munday Cell	284
6.23	The NDIR500 CO and CO ₂ Analyzer	285
6.24	A Basic Crankcase Oil Mist Detector	288
6.25	A Comparison-type Crankcase Oil Mist Detector	289
6.26	A Modern Comparison-type Crankcase Oil Mist Detector	290
6.27	The Line of Sight Smoke / Oil Mist Detector	291
6.28	The Rate of Rise Detector (Bi-metallic Strip Type)	294
6.29	The Ionisation Principle	295
6.30	An Ionization Chamber of the Combustion Detector and a Basic Circuit	296
6.31	An Infrared Flame Detector	297
6.32	An Ultra-violet Flame Detector	297

Addendum

Index of Figures

Chapter 7 – Explosion Proof Equipment		
Figure No.	Title	Page No.
7.1	The Fire Tetrahedron	310
7.2	Lower and Upper Explosion Limits	312
7.3	Flammable Ranges for Various Gases	312
7.4	The Incipient Flame Sphere	313
7.5	A Basic Capacitive Circuit	314
7.6	A Basic Inductive Circuit	314
7.7	A Basic Resistive Circuit	315
7.8(a)	Demarcation of Hazardous and Non-hazardous Areas on a Tanker	317
7.8(b)	Zones and Divisions with Respect to Components	318
7.9	The Dust Explosion Pentagon	319
7.10	Zone 20, 21 and 22 Areas	320
7.11	Sectional Views of Flameproof (Ex d) Enclosures	325
7.12	Pictorial Views of Ex d - Flameproof Enclosures	326
7.13	Schematic of a Pressurized Enclosure with Leakage Compensation	328
7.14	Symbol of Increased Safety Protection	330
7.15	Symbol of Encapsulation Protection	330
7.16	Symbol of Oil Immersion Protection	331
7.17	Symbol of Powder filling Protection	332
7.18	An Example of an Intrinsically Safe Circuit with a Single Zener Diode	333
7.19	Major Components of an Intrinsically Safe Temperature Monitor	335
7.20	An Example of an Intrinsically Safe Circuit with Two Zeners	336
7.21	A Zener or Shunt-diode Safety Barrier	336

Chapter 8 – Automation and Instrumentation		
Figure No.	Title	Page No.
8.1	Various Terms Associated with a Control System	342
8.2	An Open Loop Control System	343
8.3	A Closed Loop Control System	343

Addendum

Index of Figures

Chapter 8 – Automation and Instrumentation (Continued)		
Figure No.	Title	Page No.
8.4	Lubricating Oil Temperature Control Closed Loop System	345
8.5	An Automatic Control System	345
8.6	An Automatic Digital Control System	346
8.7	A Basic Transducer	347
8.8	A Basic Transmitter	347
8.9	Signal Conditioners	348
8.10	A Bridge Circuit used in a Signal Conditioner	348
8.11	Input versus Output of Various Transmitters	349
8.12	Temperature Ranges for Various Sensors	350
8.13	Linear Output Range of Various Temperature Detectors	350
8.14	Construction of a Resistance Temperature Detector	351
8.15	A 2-wire RTD Circuit Diagram	352
8.16	A 3-Wire System for Temperature Compensation	352
8.17	A 4-Wire RTD Circuit Diagram	353
8.18	The RTD with a Transmitter	354
8.19	Thermo EMF by Seebeck Effect	354
8.20	A Simple Thermocouple Circuit	355
8.21	Temperature (°C) versus Output (mV)	355
8.22	A Signal Conditioner for a Thermocouple	356
8.23	A Thermocouple Sensor and its Cable	356
8.24	LVDT Inductive Pressure Transmitter	357
8.25	A Strain Gauge Pressure Transmitter	358
8.26	A Capacitive Differential Pressure Transducer	359
8.27	A Basic Piezoelectric Transducer	360
8.28	Sectional View of the Transducer	360
8.29	A Differential Pressure Transmitter in a Basic Level Monitoring System	361
8.30	A Differential Pressure Transmitter as Installed in a Boiler	361
8.30 (a)	Boiler Water Level Measurement with Zero Elevation and Zero Suppression	362

Addendum **Index of Figures**

Chapter 8 – Automation and Instrumentation (Continued)		
Figure No.	Title	Page No.
8.31	Use of the Orifice Plate as a Flow Sensor	364
8.32	Working Principle of a Viscosity Sensor	365
8.33	A Viscotherm Sensor	365
8.34	A Viscosity Control System	366
8.35	On / Off Control of Tank Level	367
8.36	Response Graph of an On / Off Control System	367
8.37	Continuous Control with a PID Controller	369
8.38	Proportional Control Action	370
8.39	A Basic Controller	371
8.40	Comparison of P-Bands	372
8.41	Output of P + I Control Action	373
8.42	Response of P + I Control Action	374
8.43	Derivative Action Response	375
8.44	A Nozzle-flapper Arrangement	376
8.45	A Nozzle-flapper's Characteristic Curve	377
8.46	A Nozzle-flapper with Negative Feedback	378
8.47	A Pneumatic Relay	379
8.48	A Pneumatic Force-balance Temperature Transmitter	379
8.49	A Pneumatic DP Transmitter	380
8.50	A Pneumatic PID Controller	382
8.51	A Current-to-Pneumatic Converter	384
8.52	A Current-to-Pneumatic Converter in a Process Loop	384
8.53	Three-term Control of a Boiler's Water Level Control System	386
8.54	A Jacket Cooling Water Control System	387
8.55	A Lubricating Oil Temperature Control System	388
8.56	Parts of a Final Control Element	389
8.57	Control Valve Hysteresis	390
8.58	A Single-seated Control Valve with a Positioner (Air-to-close)	390

Addendum **Index of Figures**

Chapter 8 – Automation and Instrumentation (Continued)		
Figure No.	Title	Page No.
8.59	A Pneumatic Valve Positioner	391
8.60	A PLC in a Process Control System	392
8.61	Block Diagram of a PLC	393
8.62	Input and Output Blocks in a PLC	394
8.63	A PLC in an Automated System	396
8.64	Inside a PLC	397
8.65	The Schematic Representation of an Operational Cycle of a PLC	399
8.66	The LoaD Instruction	400
8.67	The LoaDBar Instruction	400
8.68	The Out Instruction	401
8.69	The OutBar Instruction	401
8.70	PLC Sequence of Operation	402
8.71	A Ladder Logic Diagram	402
8.72	Basic Control and Power Circuits for a Three-phase Motor	403
8.73	Inputs to and Outputs from the PLC	404
8.74	PLC Implementation of the Motor Starting Circuit	404
8.75	Dispensing Oil from a Tank	405
8.76	Ladder Logic for a Star-Delta starter	406

Chapter 9 – High Voltage Safety and Switchgear		
Figure No.	Title	Page No.
9.1	HV versus LV Conductor Size and Insulation	409
9.2	Results of an Electric Arc	411
9.3	A High Voltage Notice	414
9.4	HV Isolation Procedure	421
9.5	High Voltage Test Equipment - A Voltage Detector / Tester	421
9.6	The Front Panel of a HV Circuit Breaker	422
9.7	High Voltage Portable Earthing Cable	423

Addendum
