

Acknowledgement

We sincerely thank all the wonderful people who have supported us in every way, ever since we embarked on this project. We are indebted to many distinguished persons who have not only supported our endeavours but also permitted us to publish very valuable content for the purpose of education. These articles are relevant to the building, safe operation and conscientious survey of commercial ships. Many world-class organisations and manufacturers have also extended their invaluable support to us in all our projects. We are grateful for the updated information from their websites and related literature. These inclusions have undoubtedly enriched the content of all editions. In tribute, we have listed their names below.

Numerous students now realize their dream of being educated and supported through a scholarship program that is funded by the royalty that we receive.

The encouragement from lay people and professionals alike has thus been a stimulus to our enthusiasm. In order to give back and say “thank you” to the maritime fraternity, a free educational website – www.marine-electricity.com can be visited for more information on the subject.

Professionals

★ **Dr. Mark Peckham**

Director, Cambustion Ltd., Cambridge, London

For the permission to use information on CO, CO₂ and Fast-response Gas Analysers from the company website www.cambustion.com

★ **Christian A. Raab**

Marketing Communications Manager

NAG Marine

2511 Walmer Avenue

Norfolk, VA 23513 USA

Phone: 757-965-8708

craab@nagmarine.com

www.nagmarine.com

For the permission to use the image of the The Fluorescence Oil Content Monitor in Chapter 6
